being gotten through the senate are rather remote. The Mason bill, reported adversely on yesterday, abolishes the district of the Teche in Louisiana and adds it to the proposed new district. The Louisiana senators stand ready to oppose any such movement while, on the other hand, the treasury department refuses to recommend a bill making Post Arthur the port of entry in a new district composed entirely of Teras territory. It is claimed that the coet of maintaining the service in the district of the Teche is considerably larger than the revenue collected. The Louisiana delegation does not seem to see the matter in that light.

Catarri is round Everywhere.

Catarri is at home anywhere and everywhere. While more common in cold, changeshie climates, it is by no means counted to them, but is prevalent in every State and Territory in the Union.

The common definition of catarri is a chronic cold in the head, which if long neglected often destroys the sense of smell and hearing; but there are many other forms of the disease, even more obstinate and dungerous. Catarrh of the throat and broughful tubes

the disease, even more obstinate and daugerous.
Catarrh of the throat and bronchial tubes as well as extarth of the stousch and liver are almost as common as massi catarrh and generally more difficult to cure.
Catarrh is undoubtedly a blood disease and can only be successfully evaluated by an internal treatment. Sprays, washes and powders are uneless as far as reaching the real seat of the disease is concerned.

Dr. Melverney advises catarrh sufforers to use a new preparation, sold by druggists, called Stnart's Catarrh Tableta, because actumit analysis has shown these tablets to contain certain anti-sepile qualities of the highest value and belog an internal remedy, pleasant to the taste, convenient and harmiess, can be used as freely as required, as well for children as for adults.

An attorney and public speaker, who had been a entarth sufferer for years, says:
"Every fall I would catch a cold which would settle in tay head and throat and hings on all winter long and every winter it ascended to get a little worse. I was continually clearing my threat and my voice became affected to such an extent as to interfere with my public speaking.
"I tried traches and chean cough cures and semetimes got relief, but only for a short time, until this winter when I learned of the new catarrh cure. Stnart's Charrin Tablets, through a newsmaper advertisement. Two 50 cent heves which I bought at my druggist's, cleared my head and throat in fine shape and to guard against a return of my old trouble I keep a box of the tablets on band and whenever I catch a little cold I take a tablet or two and ward off any serious developments."

Stnart's Chatarrh Tablets deserves to bead the list as a household remedy, to check and break up courses and colds, became these tablets contain no opinite, coosine or any injurious drug.
